Eric:

You are correct in what you told the Pueblo representative. Our agreement with the NMED, all the way up to the Deputy Secretary, was that we would publish data up to Scribe where NMED would look at it along with DOE (LANL) and NMED after review would make the data available to the stakeholders and the public. Although, we collected air data from several Pueblos we were working through NMED to gain access through the State EOC and NMED networks. We were told where to show up and meet with a Pueblo representative to place the air samplers. Since we did not set up access, we did not obtain, nor were we asked by any of the Pueblos to enter into a formal access agreement or to provide them with access to the data through Scribe.

Subject: Las Conchas Fire Data Release

I received a call from Neil Weber, representing the Pueblo of San Idelfonso, concerning the release of data from the air sampling event prior to review by the Pueblo. I informed Mr. Weber that the only arrangement I was aware of regarding the release of data was for EPA to send data to NMED for public release and interpretation. Mr. Weber mentioned that he would follow up with Mark Allen on how to prevent this again.
